We have made progress in reaching several potential tentative agreements with the Company on subjects that have been on the table for the past couple of weeks although our Bargaining team position is still far apart with regards to some matters of contention with the company. Unfortunately, the Company continues to try and impose retrogressive (unsatisfactory) language from previous contracts they have bargained with other DirecTV districts.

We are not inclined to accept substandard offers from the Company and will continue to fight for a better contract.

Negotiations are fluid – once a topic has been solidified with a tentative agreement the Bargaining Committee will relay that information in another bulletin update.
